RE: Memorial Hall Service Change at JMU

Ken,

I would like to express my appreciation for the great work Keith Casteel and his crew did this past weekend. They were tasked with replacing a neglected fifty (50) year old 2000 amp service in three (3) days. The short time frame, as well as the age and condition of the service presented several interesting problems. Keith and his men were able to solve all of them like the true professionals that they are.

This service change was a very tough job and your men worked extremely hard. Keith and crew are a credit to your company. I am pleased that essentially the same group will be working on the Hoffman Hall renovation.

Sincerely,

David A. Mars  
Engineering Manager
